Session Procedures Report

FORMAT

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

Control Number: 'OTHER D'	Nickname:
Date of Session: 14 JUL 86	Target Country:
References:	Session Number: 6
Date of Report: 17 JUL 86	Mission Status:
Technique Utilized: CRV	Source Identifier: RV-021

1. (S/NF/SK) TASKING: (See session # 4 feedback). Monitor 099
2. (S/NF/SK) Session: *Amra* (Monitor ~~detected~~ employed ~~the~~ 'unencrypted' coordinates as an address; since these did not seem to 'get source back to the site' the site was aborted ~~and (page 5 of 2000000000)~~ and the original coordinates ~~were not returned to the source~~ were returned to for re-seeing the source). ~~Source~~ Source was asked to return to the ~~be~~ domed-building described in session # 4. At depth below this building source located two horizontal shafts that extended 'to the right'. (Monitor ~~was~~ ~~convinced~~ ~~was~~ ~~the~~ ~~light~~ ~~at~~ ~~the~~ ~~end~~ ~~of~~ ~~the~~ ~~tunnel~~) Monitor believed that these would lead to the target (or, the light at the end of the tunnel).

'Other D'

Session #6 cont.

3. (S/NF/SK) ~~Summary~~: Summary: ~~Site is a large room underground with access via a shaft (elevator?) and horizontal and vertical shafts and a large metal sliding door.~~
The site is a large room underground.

Access to the target is via a vertical shaft (elevator?) located beneath the domed building. Base. Two ~~horizontal~~ horizontal shafts extend "to the right" away from the vertical shaft. The people at the site, (one with oriental features), are monitoring information received from 'waves'. This information is in the form of flashing jumbled numbers on large screens. People are seated at a large console in the room.

4. (S/NF/SK) : Ops officer opined that source was ~~probably~~ on target. He briefed monitor on ~~the~~ ^{what was known about} this site ~~and~~ in the intel community and supplied monitor with a diagram which depicts target in relation to surroundings. Ops officer requested that monitor, armed with this new knowledge, return source(s) to ~~the~~ target ~~for~~ one more time. Monitor decided on the spot to employ a different set of coordinates to the problem, now that a more ~~specific~~ ^{specific} 'address' was available for the target. ~~Monitor plans to use the same address as before~~
For the next session(s), then, monitor plans to inform source(s) that the same site as before will be worked, but that a more specific 'coordinate address' (encrypted) will be used.
